

Investec UK Equity Fund

As at end May 2009

Summary of investment objective

This Fund aims to achieve capital appreciation through investment in quoted UK equity securities.

Fund overview

The UK Equity Fund aims to invest in the best British companies. It holds a substantial stake in today's blue chips – the stocks that make up the well-known FTSE 100 Index – and complements this solid core with a selection of medium-sized businesses from the FTSE 250 Index that the Fund Manager believes could be among the success stories of tomorrow.

By combining large and medium-sized companies, the objective is to produce performance that is consistent with the trend in the broader market, while retaining the potential to outperform, especially through picking winning middle-tier stocks.

The combination of strength and potential, through the holding of both actual and prospective blue chip stocks, makes the Fund an attractive choice for investors seeking to profit from the long-term growth of UK equities.

The Fund Manager structures the portfolio employing Investec Asset Management's proprietary 4Factor™ investment process which aims to focus on high-quality, attractively valued companies with improving operating performance that are receiving increased investor attention.
